

Update

# Low-Cost Science Mission Concepts for Mars Exploration

MARCH 29-31, 2022  
PASADENA, CA

  
#LowCostMars2022

New Dates!

Chad Edwards<sup>1</sup> & Shannon Curry<sup>2</sup>

<sup>1</sup>Jet Propulsion Laboratory, California Institute of Technology

<sup>2</sup>University of California, Berkeley

# #LowCostMars2022 Status Update

- The #LowCostMars2022 Conference was scheduled for 11-13 Jan, 2022, to be held at the Westin Hotel in Pasadena, CA
  - Outstanding community response – full 2½-day program incorporating science, mission concepts, technology, and emerging commercial capabilities
- Based on the Omicron-driven COVID spike that occurred in December, the Conference Organizing Committee decided in late December to re-schedule the meeting to 29-31 March, 2022
  - Strong desire for an in-person event, to maximize opportunities for creative interactions among all participants
  - Venue remains the same – Pasadena Westin Hotel
  - It is hoped that the current Omicron COVID surge will have largely subsided by this time
  - New time frame is commensurate with expected PSADS release date, supportive of MEP planning activities

# #LowCostMars2022 Status Update (Cont'd)

- Re-mapping scheduled program to new dates (no new abstract solicitation)
  - All presenters have been contacted to re-confirm plans to present
- In light of COVID concerns:
  - We will support a remote presentation capability for any oral presenter who is unable to attend in person (*but we still strongly encourage in-person participation for all who are able*)
  - Proof of vaccination will be required for all in-person participants

# Program Preview

## ***Tuesday, March 29***

Welcome
Panel: Mars Science Goals for Low-Cost Missions
Invited Talks: Programmatic Perspectives
Panel: Lessons Learned in Low-Cost Mission Implementation
Contributed Talks I
Poster Session (w/ Lightning Talk Previews)

## ***Wednesday, March 30***

Panel: Low-Cost Transportation to Mars
Contributed Talks II
Invited Talks: Challenge of the Surface
Contributed Talks III
Panel: NASA Technology Investments
Poster Session (w/ Lightning Talk Previews)

## ***Thursday, March 31***

Panel: Commercial Innovation for Low-Cost Missions
Invited Talks: Cost Models for Low-Cost Missions
Contributed Talks IV
Closing Session

- *~70 invited and contributed talks & posters*
- *5 interactive topical panels*

- Full program info available at <https://www.hou.usra.edu/meetings/lowcostmars2022/>

# Program Preview – Panel Highlights

## Mars Science Goals for Low-Cost Missions

- *Aileen Yingst (PSI)*
- *Bruce Jakosky (U Colo, Boulder)*
- *Wendy Calvin (U of Nevada, Reno)*
- *Alfonso Davila (NASA ARC)*
- *Scot Rafkin (SwRI)*

## Lessons Learned in Low-Cost Mission Implementation

- *Rob Lillis (UC Berkeley)*
- *Bethany Ehlmann (Caltech)*
- *Craig Hardgrove (ASU)*
- *Joel Krajewski (JPL)*

## Low-Cost Transportation to Mars

- *Paul Wooster (SpaceX)*
- *Eric Salwan (Firefly Aerospace)*
- *Shaun Daly (NASA KSC)*
- *Ryan Woolley (JPL)*

## NASA Technology Investments

- *Carolyn Mercer (NASA SMD)*
- *Christopher Baker (NASA STMD)*
- *John Baker (JPL)*
- *Michael Amato (GSFC)*

## Commercial Innovation for Low-Cost Missions

- *Richard French (Rocket Lab)*
- *Timothy Linn (Lockheed Martin)*
- *Johannes Loschnigg (Blue Canyon Technologies)*
- *Steve Bailey (Redwire)*

*...plus invited talks by:*

- *Joe Parrish (JPL)*
- *Michelle Rucker (JSC)*
- *Rick Davis (NASA HQ)*
- *Chris Culbert (JSC)*
- *Rob Manning (JPL)*
- *Abby Fraeman (JPL)*
- *Dave Bearden (JPL)*

# Low-Cost Science Mission Concepts for Mars Exploration

MARCH 29-31, 2022  
PASADENA, CA

   #LowCostMars2022

We hope to see you at #LowCostMars2022!
